

BEST BUFF

Spray Buff Concentrate

Formulated to clean, repair and restore the shine of today's modern, high-gloss floor finishes, this solvent emulsion incorporates detergents and polymers to quickly penetrate surface soil while removing black heel marks, scuffs and repairing light scratches. The unique acrylic ethylene copolymer in this product not only restores but enhances the original gloss of your floor finish. Continued use of solvent spray buff in a prescribed maintenance program will actually harden the finish film and substantially reduce overall maintenance costs with less frequent stripping and recoating. Excellent dressing for buffing unglazed, unfinished quarry tile which has lost its luster but may not be coated with a floor finish.

USES

- For all finishes
- For all floors
- Use with any speed floor machine

BENEFITS

- **Economical** - Reduces floor maintenance costs by extending time between stripping floors. May be diluted with up to 1 part water for normal maintenance.
- **Effective** - Cleans and shines in one operation, a special blend of detergents, copolymers and solvent provide fast, effective repair of high-traffic floors.
- **Versatile** - May be used with standard and high-speed equipment to provide optimum appearance level and excellent slip resistance.
- **Pleasant fragrance** - No fumes or lingering solvent odors.

PROPERTIES

Color	White
Flash point	None to boiling
Fragrance	Mild Aliphatic Solvent
Freeze/thaw	Protect from freezing
pH	9.2
Shelf life	1 year
Solvents	Aliphatic Hydrocarbon
Specific gravity	0.98
Total Actives	18%

SAFETY

Keep out of reach of children. For institutional and commercial use.

CAUTION: Contains Petroleum Distillates. Avoid contact with skin and eyes. **FIRST AID:** If splashed on skin or eyes, flush with large quantities of water. If inhaled, get to fresh air. If swallowed, dilute with large quantities of water. Do not induce vomiting. Call a physician immediately.

DIRECTIONS FOR USE

Read the entire label before using this product.

Sweep large debris and dust mop (preferably with a water-based dust mop treatment). For best results, damp mop as needed using a neutral detergent. Make sure the floor is completely dry before beginning the spray buff procedure.

For normal maintenance, this product may be diluted up to 1:1 with water. For deep repair, use full strength. Apply sparingly through appropriate dispenser to the width of your pass. Buff as required.

Important: Remember that the choice of buffing pad (from white to red) in combination with the speed of your machine will vary results accordingly. The more aggressive the pad and the higher the machine speed, the more the finish will be removed.

Dust mop floor to pick up any residue.

Clean and store all equipment.

AUTHORIZATION

Requires no authorization by USDA prior to its use in offices and other similar nonprocessing areas.
